

# PurGuard SV-900-AF

## Reusable Cleanroom Goggles | Autoclavable

### DESCRIPTION

PurGuard SV-900-AF is a reusable and fully autoclavable goggle used in cleanrooms and sterile areas. The ventilation design and the special anti-fog coating effectively prevent lens fogging. This model is characterized by a panoramic lens, allowing wide all-around vision. The tested and certified PurGuard goggles were developed for critical environments and offer optimal protection for both the wearer and the environment.

#### Application / Usage:

Recommended for usage as part of the garment concept in sterile GMP cleanrooms (ISO 5).

### FEATURES

- Very soft and comfortable frame material
- Special anti-fog coating
- Special ventilation concept
- Fully autoclavable
